GUVVALA SAI SRI PAVAN

B.Tech – Artificial Intelligence & Machine Learning (3rd Year, 1st Semester)
Aditya University | CGPA: 9.16 (up to 2nd Year, 2nd Semester)
Email: pavanguvvala6@gmail.com | Phone: 9985829922

LinkedIn | GitHub | HackerRank

PROFESSIONAL SUMMARY

B.Tech AIML undergraduate with strong fundamentals in Python, Java, C++, C, and Oracle SQL, with hands-on experience in Java desktop application development, data analysis, and AI-assisted full-stack and embedded projects. Experienced in hackathon-based problem solving and building technology-driven solutions across AI, software, and robotics domains.

EDUCATION

Bachelor of Technology (B.Tech) – Artificial Intelligence & Machine Learning
Aditya University | 2024 – 2028 | CGPA: 9.16 (up to 2nd Year, 2nd Semester)
Current Academic Status: 3rd Year, 1st Semester

Intermediate (Class XI & XII)
Aakash Institute | Score: 963 / 1000

TECHNICAL SKILLS

Programming: Python, Java, C++, C
Databases: Oracle SQL (DBMS)
Analytics & BI: MS Excel, Power BI
Core Concepts: OOP, Data Structures, JDBC, Model–View–DAO Architecture
Project & Internship Exposure: React, Node.js, Express.js, REST APIs, MongoDB, ESP32, PID Control, MPU9250, Sensor Integration

PROJECTS & HACKATHON EXPERIENCE

Autonomous Mobile Delivery Robot (AMR) — RoboAuto Hackathon 2026
Technologies: ESP32, C++, PID Control, MPU9250, Ultrasonic Sensors, Embedded Systems

- Developed an Autonomous Mobile Robot (AMR) for indoor delivery using predefined route-based navigation.
- Implemented PID-based motion control and real-time sensor feedback for precise movement, orientation, and turning.
- Integrated MPU9250 and ultrasonic sensors to enhance navigation stability and obstacle detection.
- Developed companion software for delivery task assignment, route generation, and robot operation monitoring.
- **Achievement:** Shortlisted among the Top 10 teams at RoboAuto Hackathon 2026, conducted at VJIT, Hyderabad.

AI & ML-Based Mandi Price Prediction Application — HackSprint 2K25

- Developed an AI & ML-based application to forecast **7-day mandi prices** using AGMARKNET data and a Random Forest prediction model.
- Built a Flutter frontend with a FastAPI backend using an AI-assisted development workflow.
- **Achievement:** Shortlisted among the **Top 10 out of 148 teams and secured 4th place at HackSprint 2K25 – Digital Campus 2.0 on Google Cloud.**

UniCampus – Full-Stack University Platform

- Developed a scalable university-focused platform with a Node.js and Express.js REST API backend and MongoDB Atlas using Mongoose **through an AI-assisted development workflow**.
- Designed modules for authentication, users, posts, marketplace, chat, notifications, reports, and administration.
- Structured the backend using controllers, routes, models, middlewares, services, and utilities for maintainability and scalability.
- Integrated Cloudinary-based media upload and storage workflows for platform content.
- **Achievement:** Received the Best AI Integration Award for the project's AI integration.

H Desk — Hostel Management System | Java Swing

- Built a complete Java desktop application using Core Java, Swing, JDBC, and MySQL for hostel operations.
- Implemented separate student and warden portals covering registration, profiles, fee tracking, leave requests, complaints, notices, mess menus, and gate logs.
- Enabled wardens to approve or reject requests, manage complaints, publish notices, and monitor student activities.
- Applied a three-tier Model–View–DAO architecture and PreparedStatements for organized and secure database interaction.

EXPERIENCE

Full Stack Development Intern — Technical Hub Pvt Ltd
May 2026 – June 2026

- Completed a summer internship focused on full-stack development using React, Express.js, and MongoDB.
- Developed UniCampus, a university-focused digital platform, as the primary application project during the internship.
- Worked on REST API integration, database-driven application features, and full-stack development workflows.
- Integrated Llama 3.3 70B Versatile via the Groq API to build an AI-powered student doubt-solving assistant.
- Received the Best AI Integration Award for the project's AI integration.

Application Testing Experience — GoLeague | Austria-based Startup

GoLeague is a sports-focused digital platform designed to connect players and support organized sports and league activities.

- Gained short-term practical exposure to application testing by exploring features and end-to-end user flows.
- Identified functional issues, unexpected behaviour, and usability concerns from a user perspective.
- Shared testing observations and feedback with the development team, gaining exposure to real-world bug identification and application improvement workflows.

CODING & DEVELOPMENT PROFILES

HackerRank: HackerRank

Stars: Python ★★★, C ★★★★, SQL ★★★, C++ ★★★, Java ★★★

GitHub: GitHub

CERTIFICATIONS & LANGUAGES

- **Red Hat:** Red Hat Certified System Administrator (RHCSA) — Performance-Based Linux Certification
- Anthropic / Claude — Agent Skills, Claude API, Model Context Protocol (MCP), Claude Code
- Microsoft Excel – Microsoft Office Specialist
- Microsoft Power Platform Fundamentals
- Rapid C++ – Infosys Springboard
- Coursera (AI & Coding)
- Cisco Networking Academy – Coding & Programming Certifications

Languages: Telugu, English

CAREER STATUS

Third-year AIML undergraduate seeking internship opportunities in software development, data, AI/ML, and related technology roles. Open to gaining industry experience and contributing to real-world projects.
